

Classification:

Type ADU08 is a low impulse unit for recessed fitting under seats in theatres, cinemas and auditoriums. The unit is designed for fitting in a pressure chamber. The built-in resistance ensures equal distribution over the units. The unit can be supplied in other sizes and with other admission pressures.

Type ADU08

Type ADU08

Mounting:

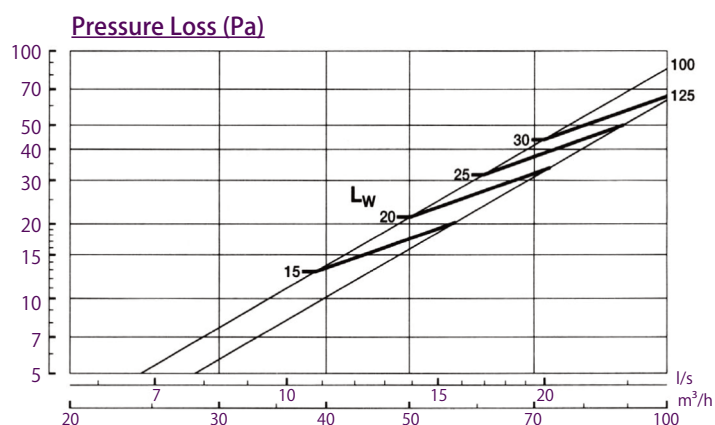

Recessed fitting under seats in risers.

Accessories:

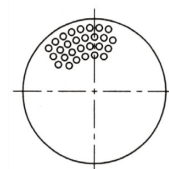

The unit can be equipped with a connection piece. A duct fitted single resistance for regulation can be supplied as a separate accessory.

Finishes:

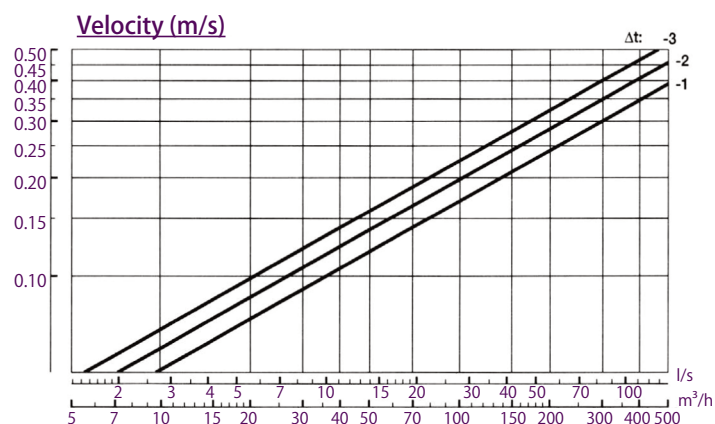

Standard finish is RAL 9010 powder coat. Other colours are available on request.
